

## Transparency

The hospitality booking system enables both parties access to view each stage of the booking process from start to finish, offering a transparent and efficient experience.

The system enables users to...

- ▶ Manage their budgets
- ▶ View and report against central management processes and costs
- ▶ View all orders and transactions
- ▶ Set departmental budgets
- ▶ Monitor and control on overall hospitality spend

## Analysis

The system offers some helpful tools to analyse bookings. All system amendments are logged and audited for effective investigation into any historical booking queries and there is also a comprehensive reporting module that aids reconciliation together with invoicing or client re-charges.
